CASRA is a global company with headquarters in Zürich. We use an adaptive approach by combining applied psychology, computer science and economic analysis in the field of security services. With our solution, we offer the best computer-based training and testing software on the market, which support police, customs and other security service providers in early detection of prohibited and dangerous items in more than seventeen countries at over 600 locations worldwide.

**Test Engineer (f/m, 40-60%)**

Do you like to put things you learned into practice? We are looking for an enthusiastic and talented graduate or student (University, FH, Informatiker/in EFZ), to join our team as a test engineer in an exciting and evolving company. You will be collaborating in a highly interdisciplinary environment with psychologists, manufacturers and security experts. If you are a team player and look for the human factor within software development, this is the right job!

**Your key responsibilities:**

- You will play an important role in ensuring the quality of our software development projects.
- You will work closely together with product owners, business analysts and software developers.
- You define and build the testing process for our software products from ground up.
- You will take responsibility for the test automation process and provide support in delivering our software products and project deliverables by describing test cases from A to Z.
- You will conduct the tests in a timely manner and evaluate the results of various test cycles.
Your profile:

- High quality awareness and good assertiveness
- Strong analytic and problem solving skills, flexible on moving targets
- Structured way of working
- Understanding of SDLC (Software Development Life Cycle) and knowledge in SQL is a plus
- Fluency in English (verbal and written) required, German a plus
- Swiss nationality or EU citizenship

If you are looking for a challenging job in a young, dynamic environment, please send your CV and cover letter by e-mail to jobs@casra.ch.
